

# **SALT WATER ART!**

Salt water is a great medium for kids to create art with!

It can also introduce the topic of evaporation, to add a science spin on art projects!

## **Secret Salt Water Painting**

Mix one fourth cup of warm water with six teaspoons of salt and 3 drops of food coloring in a small container.

Mix well.

Have children paint ocean pictures (or whatever they would like) with the mixture on white paper.

Let dry.

The water evaporates but the colored salt remains, creating beautiful pictures.

## **Crayons with salt water wash**

Draw with crayons on dark construction paper.

Then paint the entire picture with a mixture of lots of salt and water.

When the water dries, the picture will sparkle.
